

FUNERAL EQUIPMENT CATALOG

ABOUT US

We are a family business, a funeral equipment manufacturer from Slovenia. We are operating on Slovenian market for three generations, since 1966.

Our company has its own production for various funeral equipment accessories. We offer various wooden urns for the last trip, also grave wooden crosses, different metal urns, urns in combination of metal with wooden caps, pyramids, bashluks, PVC transport bags with zipper (with or without handstraps), talars, coffin sets and other funeral accessories.

Our products are very high quality, because we have our own production, so all the products can be tested in workshop.

WOODEN URNS

We offer various wooden urns for the last trip. Some are made out of walnut, and others out of beech tree. They are all then glued with ecological glue and oiled with natural oils. They also include eco-bags. It is also possible to use an organic ash capsule, that must be ordered in crematorium.

These urns are becoming more and more popular, because wood is an extremely environmentally friendly material. Costumers like these urns, because they disintegrate over time – like the cycle of life.

It is also possible to make different motives according to order, because we are equipped with laser in a company. So we are always open for special wishes of our costumers.

URNS IN COMBINATION OF METAL WITH WOODEN CAPS

Here you can find urns, that have a bracelet with an equal pendant as on the large urn, and macrame knitted string. We also attach a dedication -Until we meet again...- and pack everything in a small paper box.
